ZERO
NIGHTS

WWW.ZERONIGHTS.RU

BigBrother Matrix R&D is...

PETER-SERVICE

20 years

solutions for telecom

full lifecycle

≈ products serves 100M clients

≈ 1K employees

Agenda

1. ethics and legality
2. why & what for ?
3. how does it work ?
4. use cases
5. let's **HACK** ?

WTF DPI?

http://en.wikipedia.org/wiki/Deep_packet_inspection

1. raw packets, a lot of...
2. inline or on-copy
3. flow \approx from SYN to FIN

ethics and legality...

1. DPI – is just a method, **no bullshit**
2. ethics & legality – is **completely** defined by a task and purpose
3. peeped in the payload – got a DPI
4. 100500+ use cases

topgun – why & what for ?

1. competitors have problems
2. **fixed scope**, poor scalability
3. depending on a hardware,
vendor lock-in, beetles ;)

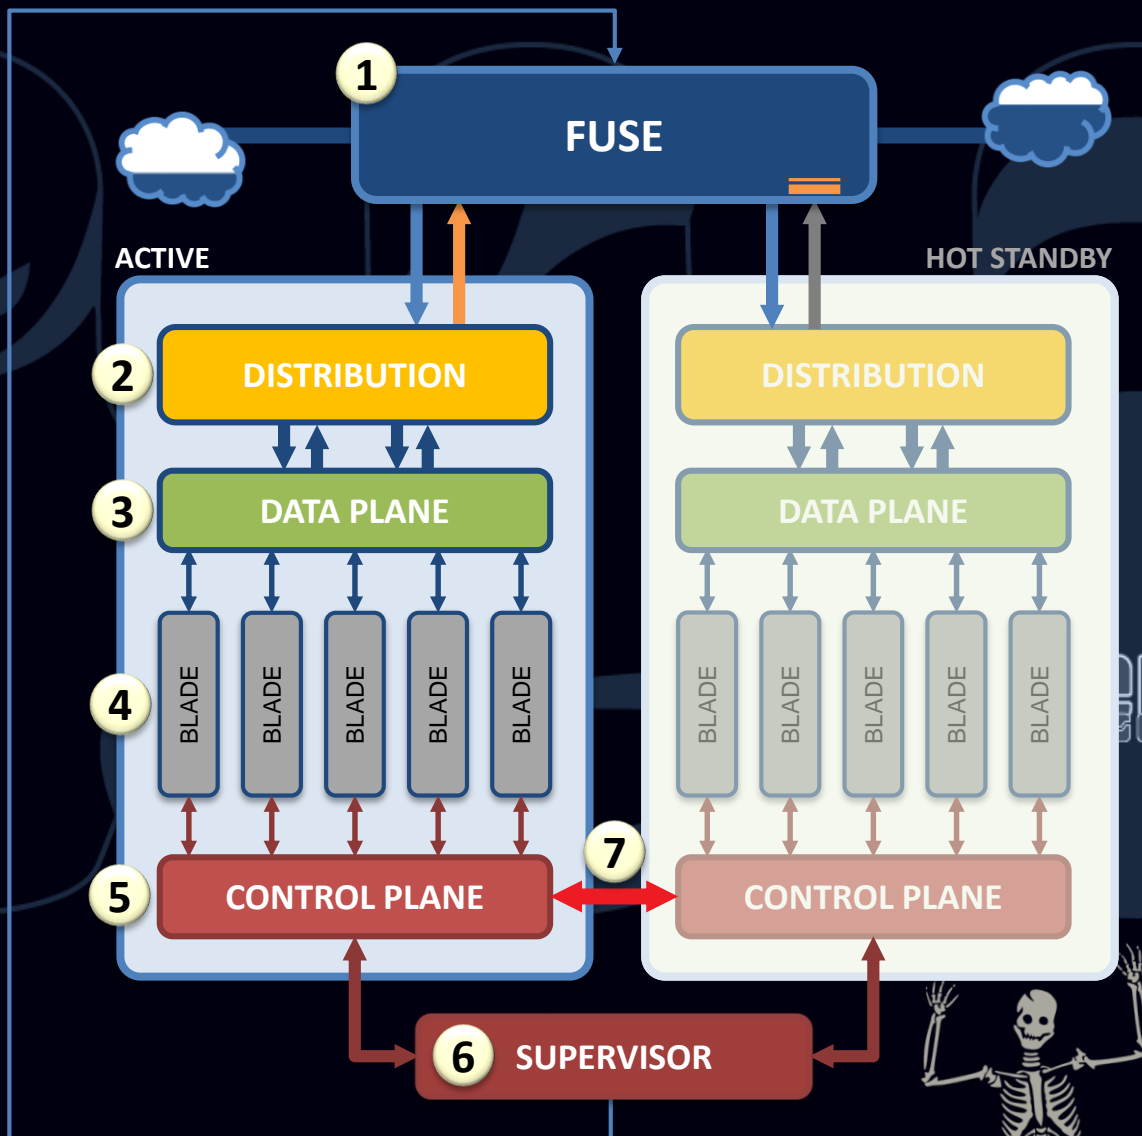

topgun – how does it work ?

just awesome cool ;)

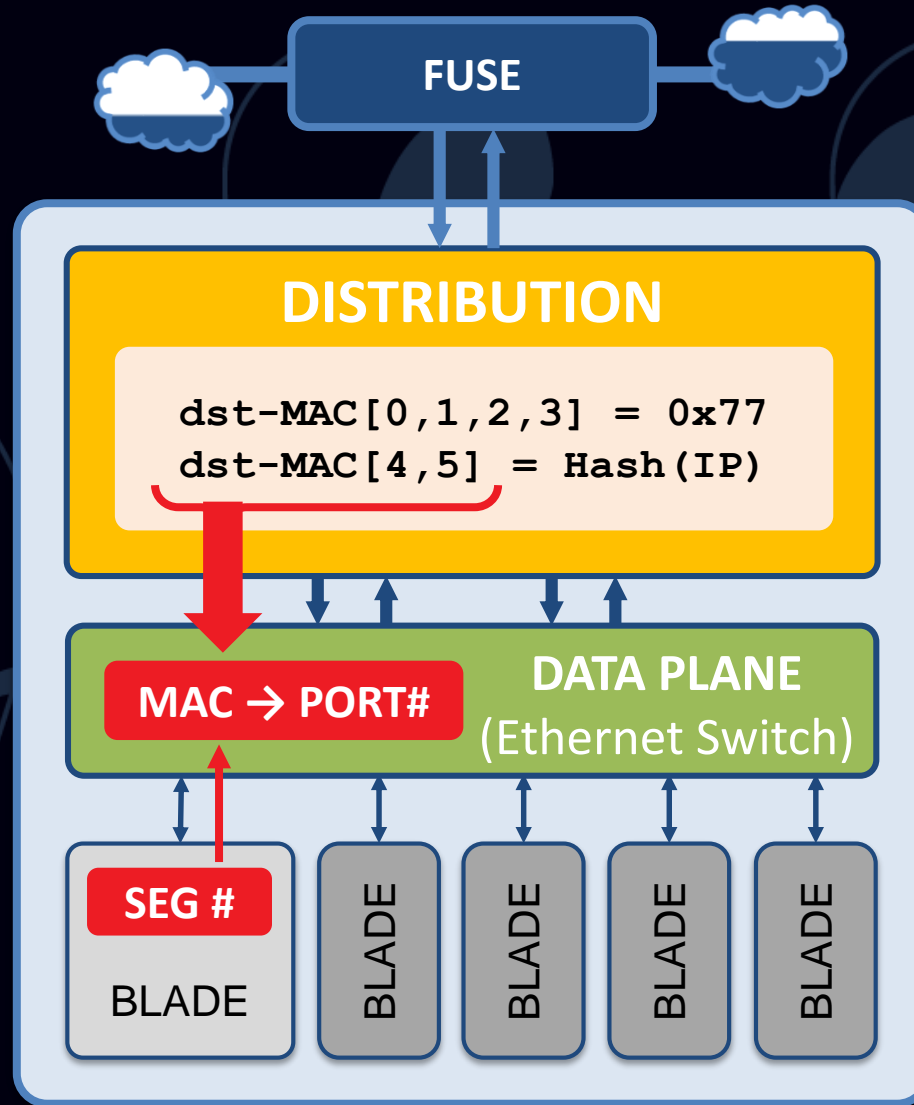

1. MAC rewrite + L2
2. Swarm Intelligence
3. FSM with replication

skeleton

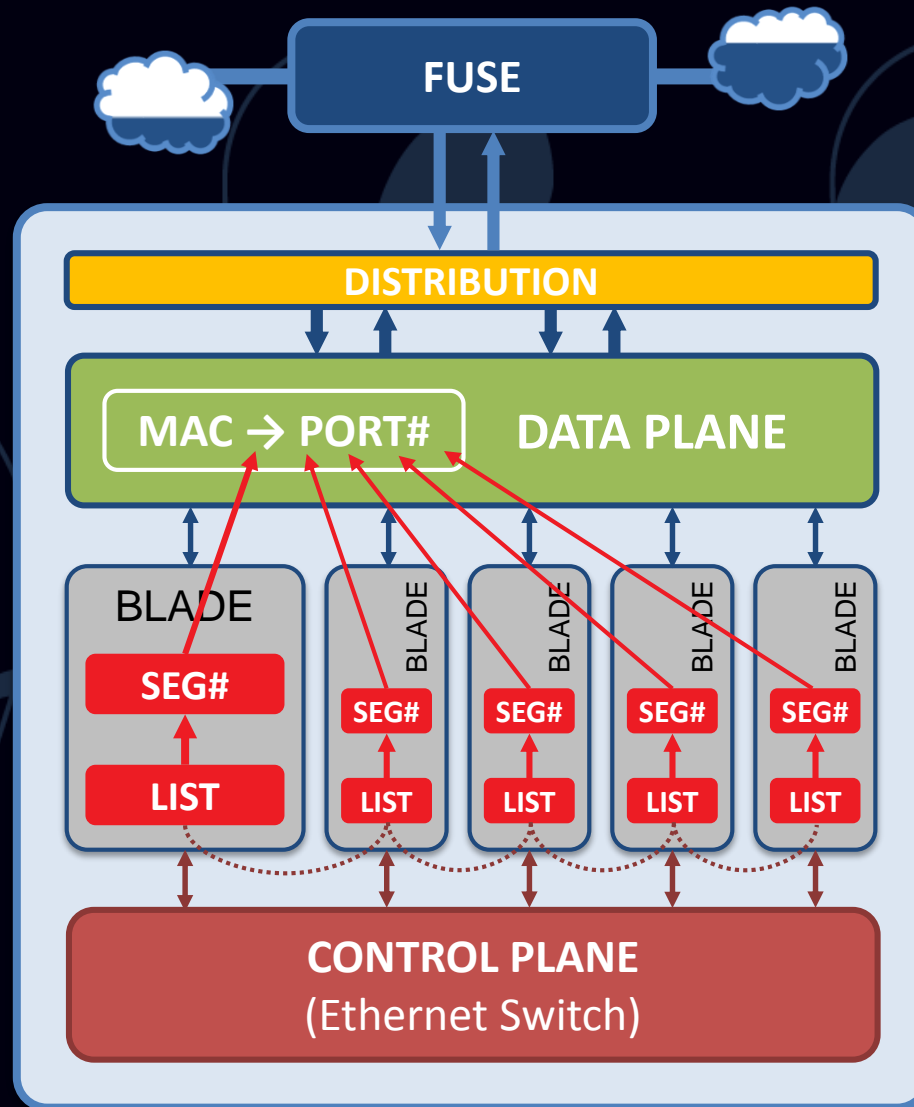

workload distribution

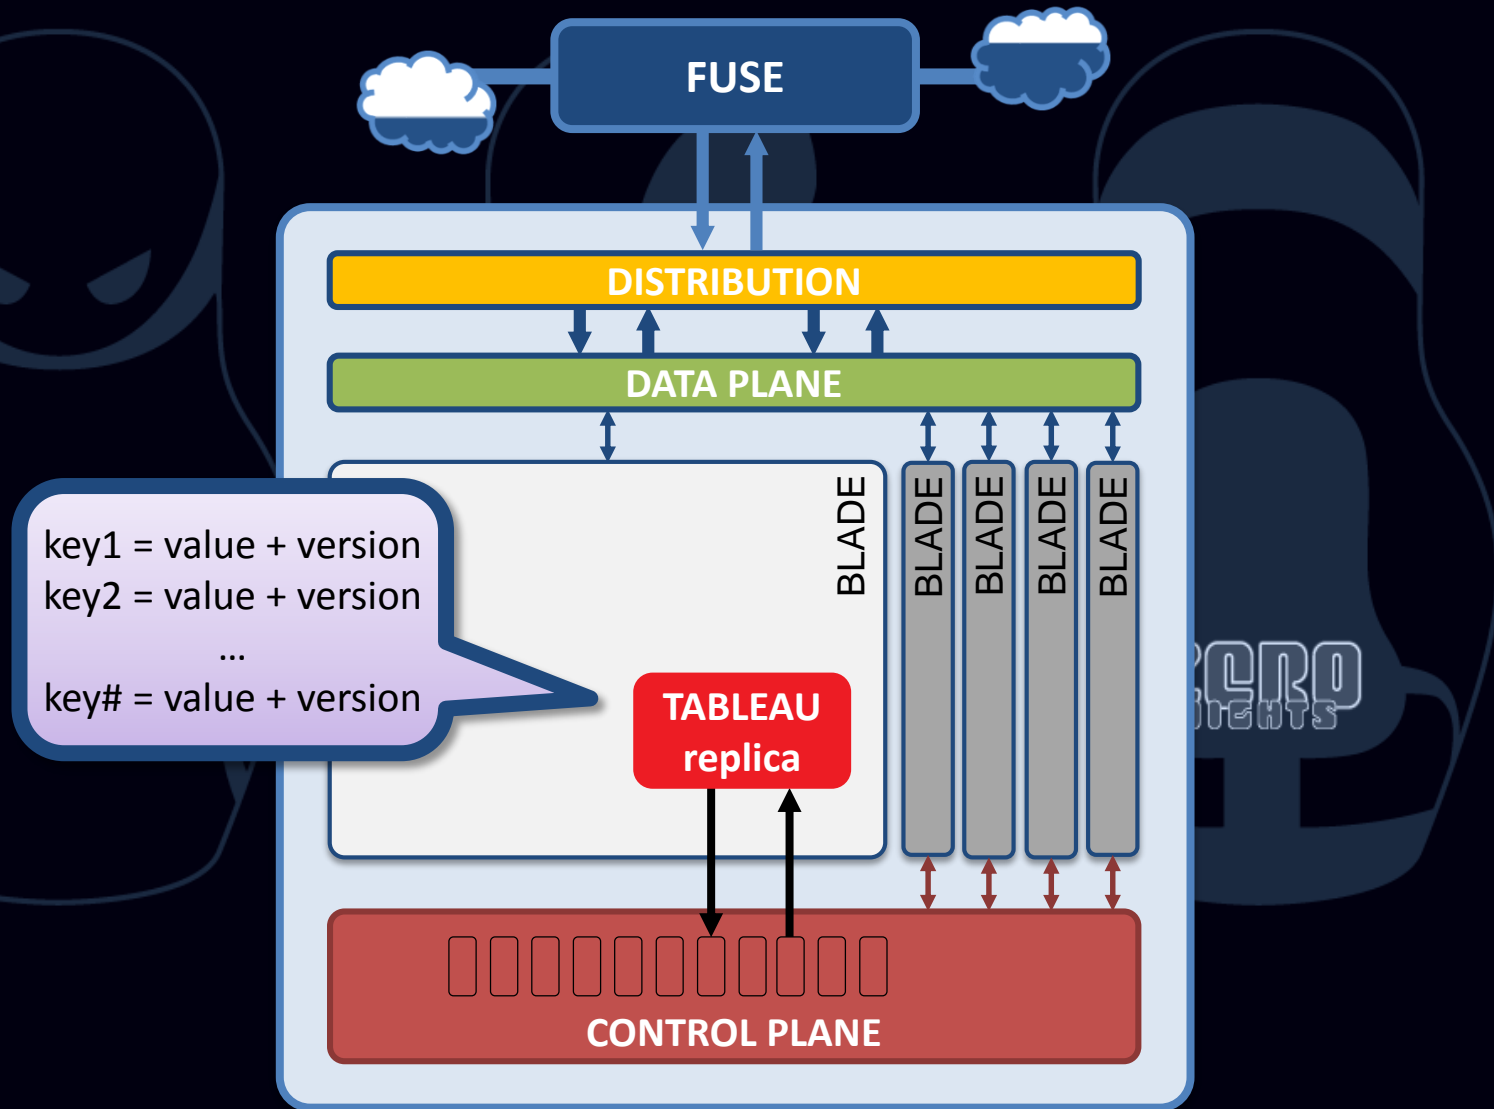

A cinematic scene featuring a woman with glowing orange eyes and a large, menacing creature with a glowing red eye. The woman is in the foreground, looking slightly to the right. The creature is in the background, partially obscured by shadows. The overall atmosphere is dark and mysterious.

swarm intelligence

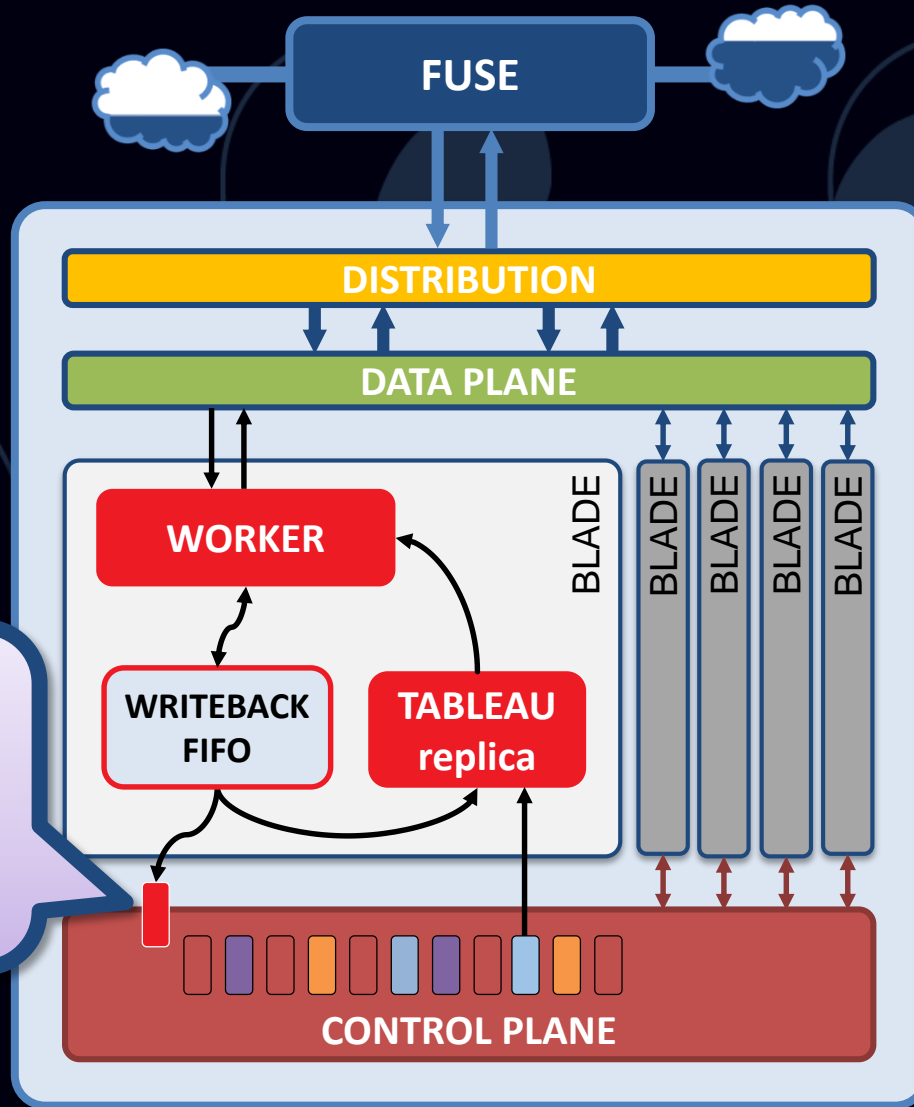

swarm #1: balancing

swarm #2: tableau

swarm #3: do it

from=10.0.0.1:4629
to=199.32.42.3:80
node={A.5, Green}
...
inbound=200
outbound=6346

ZERO NIGHTS

topgun – where to buy...

oops, offtopic !

1. no product now
2. details 
3. currently just talking

topgun dpi will...

Monitoring & Protection

IDS / IPS,
Transport / Signalling,
Overload

GSM / UMTS / LTE

PCEF, TDF, ...

Control

QoS, Policing,
Shaping, Filtering

+100500...

**Useful
Protocol Detection**

Shaping

Deep Filtering

**commodity
hardware**

**wide
application scope**

**extend by demand
on the fly**

let's HACK ;)

1. cherry-pick single worker
...by known hash-distribution
© Alexander Lyamin %)
2. SYN flood
3. IP-fragment flood
4. deceive classification
5. bypass HTTP filtering
6. **your turn...**

topgun – main **benefits**

- 1. elastic:** performance scalability, wide application scope
- 2. expandability:** by demand, on the fly, just connect hardware
- 3. enhancement:** by demand, non-intrusive two-step, new soft in a new server
